

October Meeting

Lance Rust from the Dallas Chapter gave us a basic rundown on the principles of the upcoming electric test we will all need in order to service our customers in the future. Thank you Lance for taking the time to drive all that way to speak to us.

Our own Paul Nelson also spoke to us about his knowledge on electrical work.

Classic Tile and Plaster Eric Miller and Jerry Reynolds are new chapter supporters. Welcome!

Ric Hart with Zodiac has been a supporter of our chapter for so long he is part of our group and much appreciated.

Keith Coy, Brad Stoker and Anthony Mariani with Hayward where also present for our October meeting.

Jon Cannon and Heidi Amos with Pentair joined our October meeting.

Christmas Party

Time again for our annual "White Elephant" Christmas party: these are the rules.

Everyone that wishes to participate brings a wrapped unmarked gift valued around \$20 - \$25 (don't be cheap!)

The gifts are all placed together and a numbered ticket is given to the person who brought it. When all have arrived, the tickets are drawn in random order, one at a time.

The first person drawn selects a gift and unwraps it for all to see.

The second person drawn has the option of selecting a wrapped gift or can "steal" the gift the first person has. If this gift is stolen, the first person must select another wrapped gift and unwrap it for all to see. (are we having fun yet???)

The third person drawn has the option of selecting a wrapped gift or "stealing" the gifts of the first or second person. This continues until all numbers have been drawn and all gift's distributed.

Some additional rules:

- A gift can only be stolen twice, the third person to have it becomes the gift owner.
- You can't steal back a gift once it has been stolen from you.
- Once its gone it's gone.

Remember it's all in fun, lets have a good time.

Good luck to us all!!

Tina Slagle

Congratulations to the board on getting reelected. I look forward to another 2 years working with you all and implementing new ideas. Thank you again for all of your hard work in the past and let's make next year even better.

I need volunteers for the Southwest Pool and Spa show that is being held in San Antonio Feb 12th-13th. The hotel to make reservations is the San Antonio Marriot River Center. The Ft. Worth chapter is in charge of working the booth and selling our IPSSA books at the booth as well. All of the proceeds will go directly to our chapter. If you are interested, and need more information please contact me. Any time that you may be able to give will be appreciated.

Jason S. Lehmann

President Ft. Worth IPSSA

Valuable Coupons & More...

REPLACE ANY COMPETITOR'S GAS HEATER WITH A HAYWARD UNIVERSAL II-SERIES HEATER AND RECEIVE A \$150.00 MAIL-IN REBATE.

PLEASE PRINT CLEARLY TO ENSURE PROMPT REPLY. IN ORDER TO RECEIVE REBATE YOU MUST SEND IN THE FOLLOWING: (A) COMPLETED REBATE COUPON, (B) COPY OF SALES RECEIPT, (C) DATA PLATE FROM COMPETITOR'S HEATER AND (D) HAYWARD CUSTOMER WARRANTY CARD WITH ALL INFORMATION COMPLETED.

NAME: _____ HAYWARD ID#: _____
 ADDRESS: _____
 CITY: _____ STATE: _____ ZIP CODE: _____
 PHONE: _____ EMAIL: _____
 COMPETITOR'S MAKE: _____
 COMPETITOR'S MODEL#: _____
 COMPETITOR'S SERIAL#: _____

ALL INFORMATION MUST BE COMPLETED IN ORDER TO RECEIVE REBATE.

HAYWARD Pool Products
One source. Every pool.

THIS OFFER IS ONLY AVAILABLE FOR SERVICE PROFESSIONALS.

Contact your Hayward Representative for more information.

Totally at your service.

Your single-source partners delivering superior products and services.

Feel free to call or e-mail any of your Totally Hayward™ Professionals listed below with any of your questions.

We Fix Pools... Fort Worth

ALL HAYWARD POOL SERVICE TECH'S

We have created WeFixPoolsFortWorth.Com to help potential customers in Fort Worth find a Pool Service Tech online fast.

GET LISTED FREE!

Send us by E-Mail your Company Name, Contact Name, Contact Phone Number, and E-Mail address to get listed on WeFixPoolsFortWorth.Com for FREE until February 2010.

Info@WeFixPoolsFortWorth.com

Each listing includes an e-mail contact form that sends to your contact e-mail address and, stores the form data on the server to help you build a client contact list.

Starting in February 2010 a \$50.00 Monthly Subscription will be required. Subscription payments handled through www.paypal.com only. Part of your Subscription goes to fund a Google AdWords account. Limited space available, listings placed in order received.

Contact Brady Davis with any questions. (817) 946-0031

IntelliFlo® VS+SWS:

A monumental advance in energy efficiency, safety, service life, and silent operation

The IntelliFlo® *vs-sws* is the revolutionary way to reduce energy costs and meet the desire for the safest, pool possible. This "Intelligent" pump can cut the pool portion of utility bills 30% to 90% and save you hundreds of dollars per year and thousands of dollars over its life. On the safety front, you install a Safety Vacuum Release System (SVRS) that senses drain blockage and automatically shuts the pump off in seconds to provide an important layer of entrapment protection.

The Savings Story

An exclusive blend of technologies enable you to slash pump-related utility bills.

Exclusive, advanced motor technology: IntelliFlo® pumps are the first to use exclusive permanent magnet motor technology (used in hybrid cars). This provides special "house savings" of 30% over pool pumps with traditional induction motors.

Onboard intelligence with variable drive: IntelliFlo® *vs-sws* also includes a variable speed drive, along with digital controls and proprietary software that allow custom programming of optimum pump speeds for specific tasks—filtering, cleaning, heating, spa jets, waterfalls, etc. There are eight individual, adjustable speed settings at your command.

For virtually all applications, the optimum speed will be lower than the present, unchangeable speed of older pumps. So you can exploit a fundamental pump law—slow down the pump and cut energy use dramatically. The result is savings added to those achieved by the superior efficiency of the permanent magnet motor.

The Safety Message

IntelliFlo® *vs-sws* is the first pump with an integrated Safety Vacuum Release System (SVRS) that provides an important layer of entrapment protection. Its built-in controller and proprietary software detect blockage of the drain and automatically shut the pump off within seconds. Other notable features include:

- Meets ASHRAE 112 (1917, 2002) standards, complying with Federal legislation related to public pools (Virginia, Graeme Baker Pool Safety Act), as well as state and local statutes/codes for residential pools where entrapment protection measures are required.
- Safety lock-out feature (password-protected) prevents pump speed settings from being changed by anyone but you.
- Unlike other devices, the built-in SVRS protection cannot be turned off.
- Ability to set minimum and maximum speeds—IntelliFlo will only operate within ranges you set to help assure safe operation and long equipment life.
- For added safety, if the SVRS becomes disabled, the pump will not run.
- No SVRS calibrations needed.

How much is 30% to 90% worth to you?

Here are realistic estimates of annual pool pump savings when comparing a traditional energy-efficient (EE) single-speed, 2 horsepower pump to IntelliFlo *vs-sws* in a 20,000 gallon pool. Savings are calculated using common run times of 6 and 12 hours.

- At \$0.15/kWh, estimated savings range from \$620 to \$1,360 per year.
- At \$0.20/kWh, estimated savings range from \$825 to \$1,810 per year.
- At \$0.30/kWh, estimated savings range from \$1,240 to \$2,710 per year.

Savings may vary based on plumbing size and length, pump model, service factor, flow rates and other hydraulic factors. Estimate your savings online.

Estimate your savings based on the size of your pool, your current pump (or one you're considering) and local utility rates at www.pentairpool.com. Just click on our Pool Pump Energy Savings Calculator.
